

Moran scatterplots: Cumulative agricultural TFP (X)

● HH: High-high ■ LL: Low-low ▲ HL: High-low ▼ LH: Low-high ○ Not significant

Line slope = global Moran's I ; panel p = original global permutation p_{sim} (999 permutations).

Point colors/shapes show local $p_{sim} < 0.05$ classifications, unadjusted for multiple testing.

2016 is omitted: cumulative TFP equals 1 in all provinces; the spatial statistics are not defined.
